

delete(user)

Description:

An Admin is selecting the option to delete a user and in a dialog window asked if he is sure about this.

Precondition:

The user is logged in as an admin and open the usermanagement tab.

Postcondition:

A Dialog window is open to verify that the user wants to delete the selected user.

Returns:

Returns nothing

Exceptions:

Doesn't throw an exception.

Result:

A Dialog window is open to verify that the user wants to delete the selected user.

Type:

Systemoperation

References:

cancel, ok

Comment:

If the user tries to delete himself a dialog is open, that that is not possible.

cancel
<p>Description: The Admin decides to cancel the operation to delete a user.</p> <p>Precondition: The user is logged in as an admin, open the usermanagement tab and started the delete user operation, which opens a dialog window to verify the decision.</p> <p>Postcondition: The delete user operation was canceled and the normal usermanagement view is shown.</p>
<p>Returns: Nothing</p> <p>Exceptions: Throws no Exceptions</p> <p>Result: The normal usermanagement view is shown.</p>
<p>Type: Systemoperation</p> <p>References: delete(user), ok</p> <p>Comment:</p>

ok
<p>Description: An admin verifies that he wants to delete the selected user and the user is deleted.</p> <p>Precondition: The user is logged in as an admin, open the usermanagement tab and started the delete user operation, which opens a dialog window to verify the decision.</p> <p>Postcondition: The selected user is deleted from the database and the normal usermanagement view is shown without the deleted user.</p>
<p>Returns: Nothing</p> <p>Exceptions: Throws no Exceptions</p> <p>Result: The normal usermanagement view is shown without the deleted user.</p>
